

## **2016 Mission Statement**

The CWC Philanthropic Committee will provide funds and support to local women and children who are trying to become independent and rise above the poverty level by working with and through select local organizations that provide specific services to these families. Our support will be through fundraisers, volunteering our time and service and encouraging others to join in.

We will participate in and help promote participation by others in charitable events run by agencies other than local agencies and in events benefiting multiple causes, not always just for women and children. We will do this to support fellow members of CWC that request our participation with their charity.

### **Evaluation Process for Selecting Organizations**

Organizations selected are reviewed by our members to ensure that their use of funds, the results achieved and the recipients served all meet the requirements of the CWC By Laws and those of the Philanthropic Committee.
